

TAB Repost History

Akun TAB

Log lengkap semua pasangan yang sudah direpost, lintas semua dinas

rdt/repost-history

The screenshot shows the 'TAB Repost History' interface. The sidebar on the left contains navigation links: Dashboard, Need Identification, Wait to Repost, TAB Repost History (selected), Period Settings, Guidance Application, and Feedback Application. The main content area has a header with the GMF AeroAsia logo and the title 'TAB Repost History'. Below the header, there's a section for 'REPOST DETAIL TRANSACTION' with a 'Deadline repost periode 2026-07: 1/8/2026, 00.00.00'. The main area displays a list of transactions with columns for 'Bulan' (Month) and 'Tahun' (Year). The transactions are listed with their respective dates and times, and a 'Download' button is available for each entry. The interface also includes a 'Terapkan filter' (Apply filter) button and a 'Bersihkan' (Clear) button.

1. Berbeda dari Repost History milik PIC, di sini TAB melihat riwayat **seluruh dinas**, bukan cuma dinas sendiri.
2. Kalau satu pasangan dinas sempat terpecah jadi beberapa file SAP (kasus >300 baris), gunakan kolom **Nomor subdoc SAP tambahan** + tombol + **Tambah subdoc** untuk mencatat nomor subdoc dari file kedua, ketiga, dst.
3. Klik **Download** untuk mengunduh ulang file Format TAB yang sudah pernah diposting sebelumnya (untuk verifikasi ulang).
